Forecast for Saturday 11 Nov 2023

Weather: Early mist and fog patches in sheltered areas, especially in valleys. Any mist and fog will clear early this morning to leave a dry and bright day, with sunny spells this morning. Then clouding over this afternoon and evening.

Chance of cloud-free hill tops above 600m: 70% rising to 100%.

Low cloud and visibility: Poor visibility at low level in any mist and fog. Patchy or scattered early cloud may affect hills near the summits early today, especially in the west. By late morning very little low cloud is expected with far reaching views likely throughout today.

Meteorologist's View

Northwesterly winds falling light on Saturday. Feeling chilly out of the sunshine.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sat 11 Nov 2023	10.4mm	30.2mm	45mm

Forecast for Sunday 12 Nov 2023

Weather: Rain will arrive by the end of the night, mostly light but with some heavier bursts possible. The rain will move away late morning, then temporary drier and perhaps brighter conditions follow, before more rain arrives early afternoon. This rain will be heavy and will clear away through the evening with broken cloud following.

Maximum wind: East 25 mph gusts 40mph.

Chance of cloud-free hill tops 600m: 90% early and late in the day falling to 40% with low cloud associated with rain.

Low cloud and visibility: Mainly clear during the morning, although where mist and fog patches have formed visibility will be poor for a time early in the morning. During the afternoon patchy low cloud will spread east falling below the summits, by late afternoon scattered cloud above 500m can be expected with moderate or poor visibility at times.

Temperature: **Valleys:** Plus 1 rising to 7 Celsius.
At 600m: Plus 2 Celsius rising to Plus 6 Celsius later.
Freezing level: Above all summits
